## Fund objective

The Fund aims to provide a return on your investment (generated through an increase in the value of the assets held by the Fund) by tracking closely the performance of the FTSE World North America Index, the Fund's benchmark index. The Fund invests in equity securities (e.g. shares) of companies that make up the benchmark index. The benchmark index measures the performance of equity securities of leading companies listed in the United States and Canada. The benchmark index is a free float-adjusted market capitalisation weighted index. Free float-adjusted means that only shares readily available in the market rather than all of a company's issued shares are used in calculating the benchmark index. Free float-adjusted market capitalisation is the share price of a company multiplied by the number of shares readily available in the market. The Fund is passively managed and the investment manager has limited discretion to select the Fund's investments and in doing so will take into consideration the benchmark index. The Fund intends to replicate the benchmark index by holding the equity securities, which make up the benchmark index, in similar proportions to the benchmark index. The Fund may also engage in short term secured lending of its investments to certain eligible thi...
