

OMR BNY Mellon Asian Income

Fund objective

The OMR BNY Mellon Asian Income fund invests solely in the BNY Mellon Asian Income fund, a sub fund of BNY Mellon Investment Funds ICVC, a UK authorised Open Ended Investment Company, managed by BNY Mellon Fund Managers Limited. The underlying fund aims to achieve income together with long-term capital growth predominantly through investments in securities in Asia Pacific ex Japan (including Australia & New Zealand) region. The underlying fund may also invest in collective investment schemes. Investments in emerging markets tend to be volatile and are usually considered to carry a greater degree of risk than investments in established markets. This relates to dealing, settlement and custody practices, the possibility of political or economic instability, and developing legal, fiscal and regulatory structures. The underlying fund invests into a relatively small number of assets, or into individual countries or a specific market sector. Such concentrated portfolios give rise to more risk than where investments are spread across a larger number of assets, countries or market sectors. The underlying fund may be denominated in or hold assets in a currency other than Sterling. The performance of the fund may therefore rise and fall as a result of exchange rate fluctuations. T...
