Launch Date	20-Sep-2004
Fund Size	£567.3m / \$778.5m (30-Jun-2025)

# How does FE fundinfo rate this fund?

## BlackRock Greater Europe IT

#### What is the Fund's objective?

The Fund aims to achieve long term capital growth on your investment. The Fund will seek to achieve its objective primarily by gaining exposure to the equity securities (e.g. shares) of large, mid and small capitalisation European companies, together with some investment in the developing markets of Europe. The Fund will also have the ability to invest in any country included in the FTSE World Europe ex UK Index (the "Index"), as well as the freedom to invest in developing countries not included in the Index but considered by the Manager and the directors of the Fund as part of greater Europe. Market capitalisation is the share price of the company multiplied by the number of shares in issue. The Fund may also invest in equityrelated (ER) securities (such as depositary receipts which are investments issued by financial institutions which give exposure to underlying securities), other funds, fixed income securities (such as bonds), money market instruments (MMIs) (i.e. debt securities with short-term maturities and convertible securities (which are fixed income securities that can be exchanged for shares on or before maturity). The fixed income securities and MMIs may be issued by governments, government agencies, companies and supranationals (e.g. the International Bank for Reconstruction and Development). The Fund may invest in the full range of fixed income securities which may include investments with a relatively low credit rating or which are unrated. The Fund may use derivatives (i.e. investments the prices of which are based on one or more underlying assets) to reduce risk within the Fund's portfolio, reduce investment costs and generate additional income. The use of derivatives is expected to be limited. The Fund may borrow to purchase assets for the Fund. The Fund may, via derivatives and borrowing, generate varying amounts of market leverage (i.e. where the Fund gains market exposure in excess of the value of its assets). This will magnify any gains or losses made by the Fund. The Manager has discretion to select the Fund's investments. The Fund's full investment objective and policy is set out in the Fund's latest annual report which can be found at www.blackrock.co.uk/brge. The return on your investment in the Fund is directly related to the prevailing market price of the Fund's Shares and may not reflect the value of the underlying assets of the Fund at the point of sale less costs (see "What are the costs?" below). Shares of the Fund are bought and sold on the secondary market. Typically, at any given time on any given day the price you pay for a Share will be higher than the price at which you can sell it. The price of equity securities fluctuates daily and may be influenced by factors affecting the performance of the individual companies issuing the equities, as well as market factors (e.g. supply and demand), and broader economic and political developments which in turn may affect the value of your investment. The price of a derivative changes on a daily basis depending on the value of the underlying reference asset(s) which in turn may affect the value of your investment. A change in the value of underlying reference assets can have a greater impact on the value of derivatives than if the assets were held directly since derivatives can be more sensitive to changes in the value of underlying reference assets. The Shares carry the right to receive dividends declared by the Fund. The relationship between the return on your investment, how it is impacted and the period for which you hold your investment is considered below under "How long should I hold it and can I take money out early?" The Shares are denominated in Sterling, the Fund's base currency.
