

## Clerical Medical Target Return Pension

### Fund objective

The fund aims to deliver positive returns on an annual basis with the prospect of long-term capital growth. The fund may invest in another fund or funds which provide exposure to a range of assets including shares, fixed interest securities, money market instruments, property, commodities and infrastructure. The fund has a dynamic asset allocation process which means its allocations to different asset classes can vary over time and may use a range of strategies including the use of derivatives. Derivatives may be used for investment purposes and in a way that is designed to reduce risk or cost (often referred to as efficient portfolio management). The use of derivatives may include long strategies, which aim to provide a benefit if an asset rises in value, and short strategies, which aim to provide a benefit if an asset falls in value. (A derivative is a financial instrument which derives its value from the value of an underlying asset.) The fund currently invests through the BNYM (Insight) Global Absolute Return Fund. There is no guarantee that the fund will deliver positive returns over the specific, or any, time period.

### Detailed fund information
