

# Scottish Widows North American Pension

## Fund objective

To provide capital growth through investment in a broad portfolio of shares in North American companies. The benchmark index for the Fund is the S&P 500 Index (the "Index"). The Investment Adviser seeks to outperform the Index by 1.25% per annum on a rolling 3 year basis, before deduction of fees. At least 80% of the Fund will be invested in shares of North American companies. The S&P 500 Index has been selected as an appropriate benchmark as it provides a representation of the returns of securities in the North American equities market. The Fund may only take limited positions away from the Index. This means there are limitations on the extent to which the Fund's investment in various sectors\* may differ to the Index. These limited positions can be more than is held in the Index (overweight) or less than is held in the Index (underweight). \*A sector is a business area, industry or economy which shares the same characteristics. Company shares are typically grouped into different sectors depending on the company's business, for example travel and leisure or telecommunications.
